

Rekindle

The AI revenue teammate that finds the right buyers, reaches them at the right moment, and learns what actually closes.

Sales pipeline + marketing campaigns, driven by one shared intelligence.

Team Yaytm

Paytm Build for India AI Hackathon

Track: Autonomous AI Teammates

Growth teams run on 8 disconnected tools. None of them knows the buyer.

Sales and marketing work blind to each other, and to what actually drives revenue.

01

Wrong people

Lead databases hand you 10,000 contacts. Not *who is ready to buy now*.

02

Lost memory

Buyer conversations live in WhatsApp, calls and inboxes. The CRM stays empty. Deals stall and are forgotten.

03

Guesswork marketing

Ads are written from the product page, not from what buyers actually say. Budget is spent on strangers.

04

Wrong scoreboard

Marketing optimises clicks. Sales needs qualified pipeline. Nobody connects an ad to a closed deal.

The typical growth stack

0 shared intelligence

One AI. Four jobs. One learning loop.

From "who should we sell to?" to "what should we do next?", automatically.

FIND Buying Trigger Engine

Finds companies *ready to buy now*: hiring, funding, leadership changes, expansion. Then surfaces the right decision-makers.

SELL Long-Horizon Sales Agent

Remembers every email, WhatsApp chat and call for months. Tells reps who to contact today, why, and drafts the message.

MARKET Objection-to-Campaign Agent

Turns real buyer objections into ads, LinkedIn posts, emails and landing pages. Runs them **only to target accounts**.

LEARN Revenue Loop

Ad engagement triggers sales action. Closed deals teach the system which signal, message and campaign actually worked.

31% of buyers say "implementation takes too long"

AI launches a "Live in 14 days" campaign to 40 target accounts

3 decision-makers at Acme engage

Sales Agent: "Re-engage Acme today. Here's your draft."

Deal closes, system learns

Built on a Revenue Graph

Every company, person, signal, message, campaign and deal, connected.

Layer	What it does	Tech
 Activation	Outreach drafts, ads, posts, landing pages	LinkedIn, Google and Meta ad APIs, image generation, email
 Agents	Sales Agent Marketing Agent Research Agent	Agent orchestration on the shared graph
 Intelligence	Trigger scoring, objection extraction, next-best action, creative analysis	Claude LLM (reasoning + structured extraction), rule engine
 Revenue Graph	Links company, person, signal, message, campaign and revenue	PostgreSQL + graph relationships, vector search
 Capture	Buyer conversations with zero manual entry	Gmail and calendar APIs, WhatsApp chat import, call transcription (Whisper, multilingual incl. Hinglish), CRM sync (Zoho, HubSpot)
 Data	Companies, people, public signals	Licensed enrichment APIs, job-board APIs (Greenhouse, Lever), news and funding feeds, company registry data

Frontend: Next.js + Tailwind Backend: FastAPI  Human-in-the-loop approvals  Audit logs and consent tracking built in

Other tools automate tasks. Rekindle learns what drives revenue.

The only loop where sales teaches marketing, and marketing tells sales who to call.

		Lead databases	CRMs	AI SDRs	AI ad tools	Rekindle
 "Why now", not just "who fits" Scores buyers by live triggers, not static filters.						
 Memory across months Remembers every objection and promise across email, WhatsApp and calls. Knows when a "not now" becomes "now."	Finds buyers ready <i>now</i>	Partial	No	Partial	No	✓
	Remembers the relationship for months	No	Partial	No	No	✓
 Objection-to-Campaign Marketing written from what real buyers say, not from a product page.	Marketing built from sales objections	No	No	No	No	✓
	Ad engagement triggers sales action	Partial	Partial	No	No	✓
 Reverse intent Account engages with an ad, and the Sales Agent acts on it the same day.	Optimises for pipeline, not clicks	No	Partial	No	Partial	✓
 Optimised for pipeline, not clicks Every ad and message traced to qualified pipeline in Rs.	Built for India (WhatsApp, Hinglish, Rs pricing)	No	Partial	No	No	✓

Other AI writes ads from your product page. Rekindle writes them from the reasons buyers said no.

Fewer, better actions. More revenue.

Not 10,000 leads. The six accounts that deserve attention today, and why.

Priced on revenue impact, not message volume.

Start small, prove value in weeks, grow with the customer.

One Rs 5 lakh deal = **20 months** of the Growth plan.

Expansion: India, then Middle East and Southeast Asia, then global SMB growth teams

Go-to-market

- 1 Free "Pipeline Audit": shows revivable Rs and high-intent accounts on day one
- 2 Design partners among Indian B2B SaaS and services companies
- 3 Agencies + Zoho / HubSpot marketplaces as multiplier channels

Start with the sales pipeline. Become the revenue brain of every growing company.
